

# Airport Inventory & Maintenance Management Application (IAMMAP)

## OVERVIEW

The Airport Inventory & Maintenance Management Application (IAMMAP) has been specifically developed and deployed to automate and streamline the day-to-day management functions like Inventory of goods and Maintenance of equipment at any airport.

The application is aimed at providing information required to enable quick decision-making, ensure maximum optimization of resources and minimize maintenance operation costs. The use of the application will go a long way in maximizing overall productivity at any airport.

The software application is Web enabled, easy to operate, secure and capable of easy expansion and simple interfacing with other systems.

IAMMAP has seven major integrated, interactive modules:

- General Inventory Module
- Central Radio Stores Department (CRSD)
- Central Fire Station (CFT):
- Equipment Maintenance
- Civil Maintenance
- Motor Transport
- Electrical and Mechanical Workshop

## MODULES

## FUNCTIONS & FEATURES

- Supports all Inventory and Maintenance Management related activities at airports.
- Is secure, easily-maintained and managed.
- Comes with user-friendly interfaces, documentation, and standard Windows operations.
- Multiple stock evaluations: FIFO, LIFO and Weighted Average to present detailed stock evaluation information.
- Is practical, cost-effective and can be fully integrated with existing terminal data networks, and related facilities.
- Storage of statistical data and generation of reports.
- Provision of a database for the storage of historical data for further analysis, future simulation and comparison.

# About Navayuga Infotech

Navayuga Infotech provides integrated Airport management solutions designed and developed to automate simple to complex and mission critical airport functions and operations.

Navayuga Infotech has deployed its Airport Based solutions at several airports. Our airport based software solutions offers utmost functionality, reliability, and efficiency, integrating current and future systems, with its flexible interface and customizable modular design that can be upgraded at any moment to include additional modules and functions.

Our international offices in the U.S, Asia and Europe, are poised to cope with the future needs of any airport, anywhere in the world and provide responsive customer service on a global scale.
