

Air Traffic Billing System (ATBS)

OVERVIEW

Navayuga Infotech's Air Traffic Billing System (ATBS) is designed and optimized for use at any airport. ATBS provides airport operators with valuable commercial intelligence and statistical information to enable airports to efficiently manage and automate their traffic billing.

ATBS calculates the charges for landing, parking, housing, Aerobridge usage, Fuel, X ray baggage, terminal navigation and route navigation automatically. It generates invoices for the airlines on services provided to landed flights depending on the time, resources and services allocated for the flight

The system offers utmost functionality, reliability, and efficiency, integrating current and future systems, with its flexible interface and customizable modular design that can be upgraded at any moment to include additional modules and functions.

ATBS has three major integrated, interactive modules:

- ▶ Administration
- ▶ Flight Information
- ▶ Billing

MODULES

FEATURES

- Provides Arrival and Departure Information
- Generates bills, invoices and revenue receipts for every operator
- Capable of picking up information from advanced radar systems
- Provides statistics and reports
- Functionality is fully parameterized.
- Airport wide information sharing
- Provides Emergency related Information
- Facilitates Integration with Flight Information Display System (FIDS), Closed Circuit Television (CCTV).

- Reduces operational costs by automating the billing operation
- Ensures accurate and up-to-date flight information
- Allows users to work effectively and efficiently through its friendly user interface.
- Automate the flow of information to airport operators and airline operators

BENEFITS

About Navayuga Infotech

Navayuga Infotech provides integrated Airport management solutions designed and developed to automate simple to complex and mission critical airport functions and operations.

Navayuga Infotech has deployed its Airport Based solutions at several airports. Our airport based software solutions offers utmost functionality, reliability, and efficiency, integrating current and future systems, with its flexible interface and customizable modular design that can be upgraded at any moment to include additional modules and functions.

Our international offices in the U.S, Asia and Europe, are poised to cope with the future needs of any airport, anywhere in the world and provide responsive customer service on a global scale.
